

# Managed Router

## Introduction

## Stapel Managed Router Overview

Stapel's managed router service enables managers to ease the burden of keeping one of your most important IT capabilities functioning, secure, and high performing. It's the perfect complement to your ISP's connection and offers the necessary infrastructure and security services to accommodate the complexities of securing your environment.

## Built on Open Standards

Our hardware is high performance, reliable and open. This gives us the flexibility to scale the platform without having to scale the costs.

Built on Best of Breed open software platforms, backed by Enterprise support and Security Services, our router platform utilizes Next Generation Firewall Capability to handle today's advanced threat landscape.

- ✓ **1U Rack Mount Form Factor**
- ✓ **Front or Rear Interface Orientation**
- ✓ **Up to 4 x 10 Gbps Ethernet Interfaces**
- ✓ **Up to 4 x 100 Gbps SFP interfaces**
- ✓ **6 Core, 12 Thread Processor**
- ✓ **Up to 64 GB Ram**
- ✓ **Enterprise Storage for reliable operation and logging**

## Key Hardware Features

With two standard platforms that meet the most common use cases, the versatility of our platform can handle throughput of up to 10 Gbps even with security services enabled.

We offer a platform with 1Gbps Interfaces and 10Gbps interfaces, with the ability to go up to 100Gbps fiber connections.

## Key Software Features

With solid hardware, you need a solid software platform that provides all the capabilities to keep you connected and secure in today's digital age.

With standard routing and firewall features, the Stapel Managed router is the single platform to connect, route, and secure your network.

- ✓ **Stateful Inspection Firewall**
- ✓ **Multi-WAN**
- ✓ **Virtual Private Networking**
- ✓ **Hardware Failover**
- ✓ **SD-WAN**
- ✓ **Intrusion Detection**
